

APPENDIX A Revision A Company Part Number or NSN	ACCESSORY PRODUCT DATA SHEET CAMSS Shelters CAMSS-20Q-HLLE - Insulcam™ Liner System	
Specifications as applicable		
Insulated Liner		The CAMSS-20Q-HLLE is a unique insulated liner system that installs quickly and easily into the Air Force Small Shelter System and CAMSS2Q
Insulated Flooring		N/A
Solar Shade/ Camouflage Netting		N/A
Weight (Unpackaged) (lb.)		135 lbs
Color in accordance with FED-STD-595		White
Special/Additional Features:		The CAMSS Insulcam™ system was tested and proven to reduce the usage of the ECU by 42% compared to the baseliner system with a basic liner system. The significant reduction of when the ECU is required translates to a savings on energy consumption. With the Insulcam™ liner system installed in deployed billeting shelters it helps reduce the fuel requirements at forward operating bases. We currently have our Insulcam liner system deployed to FOBs throughout Afghanistan.
